

Installed Extensions

-  **AlternateTab** by [fmuellner](#)

Substitute Alt-Tab with a window based switcher that does not group by application.

-  **AppKeys** by [franziskus](#)

Adds Super+NUM hotkeys for activating application based on Dash. Like in Ubuntu, the Unity hotkeys.

-  **Applications Menu** by [fmuellner](#)

Add a category-based menu for applications.

-  **Arch Linux Updates Indicator** by [RaphaelR](#)

Update indicator for Arch Linux and GNOME Shell.

-  **Auto Move Windows** by [fmuellner](#)

Move applications to specific workspaces when they create windows.

-  **Caffeine** by [eon](#)

Disable the screensaver and auto suspend

-  **Coverflow Alt-Tab** by [p91paul](#)

Replacement of Alt-Tab, iterates through windows in a cover-flow manner.

-  **Disable Screen Shield** by [lgpasquale](#)

Disable screen shield when screen lock is disabled

-  **Disconnect Wifi** by [kgshank](#)

Adds a Disconnect option for Wifi in status menu, when a network is connected. Shows a Reconnect option, after network is disconnected.

- Hello, World!**

An example extension to show how it works. Shows Hello, world when clicking on the top panel.

-  **Impatience** by [gfxmonk](#)

Speed up the gnome-shell animation speed

-  **Launch new instance** by [fmuellner](#)

Always launch a new instance when clicking in the dash or the application view.

-  **Lock Keys** by [kazimieras.vaina](#)

Numlock & Capslock status on the panel

-  **Native Window Placement** by [fmuellner](#)

Arrange windows in overview in a more compact way.

-  **No Topleft Hot Corner** by [azuri](#)

This extension disables the top left hot corners. You can still click on Activities or press the dedicated key to reach the

overview. Since 3.8, should work with other extensions modifying the Activities button. On versions prior to 3.8, may not disable other hotcorners in multiscreen configurations and won't work on fallback/flashback mode.

-  **Panel OSD** by [jens](#) 
Configuring where on the (main) screen notifications will appear, instead of just above the message tray
-  **Places Status Indicator** by [fmuellner](#) 
Add a menu for quickly navigating places in the system.
-  **Quick Close in Overview** by [p91paul](#) 
Close windows with a button click (the middle one by default) when in overview mode
-  **Recent(Item)s** by [leonardo.bartoli@gmail.com](#) 
Add an indicator in top panel to list recently opened files
-  **Refresh Wifi Connections** by [kgshank](#) 
gnome-shell does not request for wireless network scan once the wireless selection dialog once the dialog is opened. This extension adds a refresh button to the Wifi connection selection dialog to request for a network scan manually.
-  **Removable Drive Menu** by [fmuellner](#) 
A status menu for accessing and unmounting removable devices.
-  **Remove Dropdown Arrows** by [mpdeimos](#) 
Removes the dropdown arrows which were introduced in Gnome 3.10 from the App Menu, System Menu, Input Menu, Access Menu, Places Menu, Applications Menu and any other extension that wants to add dropdown arrows.
-  **Screenshot Tool** by [oal](#) 
Create, view and store screenshots.
-  **Screenshot Window Sizer** by [fmuellner](#) 
Resize windows for GNOME Software screenshots
-  **Services Panel** by [bjesus](#) 
Manage services from GUI panel
-  **ShutdownTimer** by [neumann](#) 
Shutdown your device after a specific time. This extension adds a submenu to the status area.
-  **Simple net speed** by [biji@gnome](#) 
Simply showing network speed. Click to change mode
-  **Status Area Horizontal Spacing** by [p91paul](#) 
Reduce the horizontal spacing between icons in the top-right status area
-  **Straight Top Bar** by [jpec](#) 
Remove round corners on topbar.
-  **System Monitor** by [elvetemedve](#) 
Display resource usage.
-  **TopIcons Plus** by [phocean](#) 
This extension moves legacy tray icons (bottom left of Gnome Shell) to the top panel. It is a fork from the original extension from ag with settings for icon opacity, saturation, padding, size and tray position, along with a few minor fixes and integration

with the Skype integration extension.

- 

Transparent GNOME panel by [ttomovcik](#)

Make GNOME top panel transparent!

- 

Transparent Notification by [ipaq3870](#)

Add transparency to Notifications.

- 

User Themes by [fmuellner](#)

Load shell themes from user directory.

- 

Volume Mixer by [alexhofbauer](#)

Applet allowing separate configuration of pulseaudio mixers.

- 

Window List by [fmuellner](#)

Display a window list at the bottom of the screen.

- 

windowNavigator by [fmuellner](#)

Allow keyboard selection of windows and workspaces in overlay mode. <Ctrl>number selects a workspace, and <Alt>number selects a window.

- 

Workspace Indicator by [fmuellner](#)

Put an indicator on the panel signaling in which workspace you are, and give you the possibility of switching to another one.
